

ACRYLIC TUBE

● INTRODUCTION

1. Raw materials:100% virgin of Mitsubishi MMA
2. Thickness:4-110mm(cast acrylic tube), 1 -10mm(extruded acrylic tube)
3. Length:2m for cast tube,any length for extruded tube
4. Colors:transparent(93% transparency),colors
5. Below is specifications:

The lengths of the above various specifications are both 2 meters in length. We also have the following specifications of 3 meters in length: Φ200, Φ250, Φ280, Φ300, Φ320, Φ350, Φ400, Φ450, Φ500, Φ555, Φ600, Φ700, Φ800, Φ828, Φ900, Φ1000, Φ1200, Φ1500.

Among them, Φ1200 and Φ1500 are the largest acrylic tubes in China at present. The thickness and color of all the above casting tubes can be customized according to customer requirements.
